Confirming Transfers

Transfer manager

This window requests confirmation before transferring the data, then indicates the progress of the operation and lastly the outcome of the transfer procedure.

Buttons

Transfer

This button executes the actual transfer.

A window will show the various operations performed during the transfer procedure.

Cancel

This button cancels the operation and terminates the program.

When the transfer is complete, this window will display a message informing you whether or not the transfer was successful.

The **Transfer** button will then be replaced by a **Terminate** button.

Terminate

This button closes the window and terminates the transfer program.
