

# Selecting AS-400 Buffers - The Details Tab

## Transfer manager

This tab displays details of the contents of the [AS/400 buffer selected](#) in the [Buffers](#) tab.

**Attention:** *this tab will only be available if the "Receive data from an AS/400 buffer" radio button has been ticked in the [direction of transfer selection window](#).*

The list will show all the objects that are to be transferred.

### Displayed data

#### Number

Number of the AS/400 sending used to obtain the buffer.

#### Description

Description of the AS/400 sending used to obtain the buffer.

#### Models

Type of model contained in the buffer:

- \*NONE    The buffer contains just a selection of objects.
- \*MCD    The buffer contains a CDM.
- \*MLD    The buffer contains an LDM.

### Lists

#### Objects

List of the objects contained in the buffer, with the name, type and description of each.

**Warning:** *This list is for information only. You cannot select anything: all the objects in the list will be transferred.*
