

Displaying the Objects Attached to an Application Area

Access

To display the objects which are actually attached to an application area, click the **Objects** button of the [Create/Modify an application area](#) dialog box.

Important: Only administrators can change the information in this dialog box.

Check boxes

Object

- | | |
|---|---|
| <input checked="" type="checkbox"/> Checked | The list is sorted on the object type, then on the object name. |
| <input type="checkbox"/> Not checked | The list is sorted on the object name. |

Radio buttons

Sort criteria

- The only sort criterion available at this level is the object name.
- The option boxes are therefore dimmed and unavailable.

Lists

Objects

- List of all the objects actually attached to the application area. The following information is displayed: type, name and description.
- These objects must be deassigned from the application area before you can delete the application area.

Buttons

Enter

- This button closes the dialog box.
- Keyboard short cut: **Esc**.

Print list

- This button prints all the objects in the list.
