Associating a Screen Standard

Access
To select the screen standard which will be associated with the application area, in the list of available screen standards for the environment, click the **Standard** button of the Create/Modify an application area dialog box.

Important: Only administrators can change the information in this dialog box.

Lists

Available standards

List of public screen standards available in the environment.

Select in this list the screen standard which will be used for the current application area: it will then appear above the list in the "Selection" field.

Single-selection list.

Buttons

Associate (validation)

This button validates the selection made and closes the dialog box.

Cancel

This button closes the dialog box without validating the selection made.

Keyboard shortcut: **Esc**.
