RAD - Selecting the Graphical Representation (Single Entity)

(Step 4)

This RAD wizard window is used to select the program's graphical representation. This choice is presented when the selected scenario is "Single entity".

Displayed data

An image presents a sample dialog box corresponding to the selected type and graphical representation. It includes a tooltip that gives a brief description of the program's behavior.

Type

Radio buttons

Management program

The program that will be built will enable database modifications.

Viewing program

The program that will be built will not enable database modifications.

Graphical representation

Radio buttons

Update list (only if 'Management program' is selected)

The program will contain a list of records in which the updates can be made directly.

Prompt list (only if 'Viewing program' is selected)

The program will contain a list and will return the selected record's keys.

List + Form

Two programs will be built:

- The first will contain a list of records;
- The second will present the data corresponding to the record selected in the first program.

If Viewing program: both programs will be in view only mode.

If Management program: the first program will authorize the deletion of records, and can call the second in create or modify modes.

List and details

The program will contain a list with a details part presenting the data corresponding to the record selected in the list.

If Viewing program: the list and details part will be in view only mode.

If "Work with" program: the list will authorize the deletion of records; the details part will authorize the creation and modification of records.

Buttons

Opens a dialog box to define the RAD wizard's options.

Displays the window used to select entities.

Displays the program's definition window.

Prompts the user to save the information entered before closing the RAD wizard.
