

# Working with the File of Files (Knowledge Base)

## Access

To work with a file of files with the same format as the knowledge base, click the Edit (KB) button in the [user file management](#) box.

## List

File of files

List of entities, with their corresponding file names.

## Buttons

Save to DB

This button saves the current list to a database.

New rows

This button adds ten blank records to the current list.

Duplicate entities

This button identifies any duplicate entities, highlighting them in the same color.

Duplicate prefixes

This button identifies any duplicate prefixes, highlighting them in the same color.

Duplicate files

This button identifies any duplicate physical files, highlighting them in the same color.

Clear duplicate color(s)

This button clears the colors used to highlight any duplicates.

Delete selection

This button lets you delete the selected rows.

Exit

This button closes the dialog box.
