The Submitted Job Queue (Job Manager)

This is the list of the generation and print tasks submitted to the Job manager.

The job manager will perform these tasks, and if necessary produce compiling tasks, adding them to the bottom list.

The list shows the following information, in the relevant columns:

Seq.

Sequence number of the job.
This column may also contain icons that represent the job's status:

Icon	Job status
⇨	The job is active.
✋	The job is held.
❗	The job produced an error.
✖	The job was being processed when the job manager stopped.

Name

Name of the job.

Type

Job type.

Software engineer

Name of the software engineer who submitted the job.

Status

Status of the job.

Message	Job type
Waiting	The job is waiting to be processed.
Done	The job was processed successfully.
Running	The job is active (being processed). It is shown in a different color, and has the ⇨ icon in the **Seq.**. column.
Held	The job is held. This is represented by the ✋ icon in the **Seq.** column.
Errors	The job terminated with an error. This is represented by the ❗ icon in the **Seq.** column.
Warnings	The job terminated with a warning.
Failed	The job was being processed when the job manager stopped. This is represented by the ✖ icon in the **Seq.** column.

Platform

Only the message **Windows** will appear, as jobs submitted to the job manager are in all cases Windows jobs.

Priority

Priority of the job:

Message	Job priority
Slow	The job has the lowest priority setting (it will be processed last).
Normal	The job has a normal priority setting.
Fast	The job has the highest priority setting (it will be processed first).
Slow print	The print job has a low priority setting.
Fast print	The print job has a low priority setting.
