Deployment

Download the application

On the Hardis server: <https://nexus.hardis-group.com/#browse/browse:adelia-isv:hardis%2Fcom%2Fwagonandroid%2Fhardiswms-legacy>

Install the application on the terminal

Configure the application to connect to the server

Create the **/Hardis/Reflex/Conf/configurations.xml** file (external storage). This file contains the list of configurations.

Example of the content in this file:

```
<?xml version="1.0" encoding="UTF-8"?>

<configurations>

<configuration><name>Tests</name>

<url>http://<web server name>:port/reflex?RFXENV=<environment_name>&amp;RFXPGM=HEPWAG&amp;RFXFOR=01</url>

<key>l_Portrait</key>

<icon>favicon.ico</icon>

</configuration>

</configurations>
```

A configuration will need to be created for:

- each Reflex environment,
- each terminal orientation (portrait/landscape),
- each application resolution (320x240, 640x480, 800x600).

Terminal type	Value to be configured	Key value
---------------	------------------------	-----------

Mobile WMS with buttons at bottom.	RFXPGM=HEPWAG&RFXFOR=01	1_Portrait																														
																																
Mobile WMS with buttons to the right.	RFXPGM=HEPWAG&RFXFOR=03	2_Landscape																														
																																
Truck driver	RFXPGM=HEPWAG&RFXFOR=02	3_Truck_Driver
